High-risk definitive nodal clinical target volume: CTV-N-HR . CTV-N-HR includes the GTV-N with a surrounding margin due to the risk of rupture or ENE. Concerning the incidence of the ENE, Ghadjar et al. analyzed 231 nodes with ENE and 200 nodes without ENE in 98 patients. The incidence of ENE was correlated with lymph node size: lymph node with a diameter of more than 10 mm had a risk of 48% ...

[A Guide for Delineation of Lymph Nodal Clinical Target ...](#)

Background and purpose: In 2000, a panel of experts published a proposal for the selection of lymph node target volumes for definitive head and neck radiation therapy (Radiother Oncol, 2000; 56: 135-150). Hereunder, this selection is updated and extended to also cover primary sites not previously covered. Patients and methods: The lymphatic spread of head and neck cancers into neck lymph nodes ...

REVIEW Open Access Guidelines for delineation of lymphatic clinical target volumes for high conformal radiotherapy: head and neck region Hilke Vorwerk1,2* and Clemens F Hess1 Abstract

[A Guide for Delineation of Lymph Nodal Clinical Target ...](#)

The value of lymph node irradiation has already been demonstrated by various studies and meta-analyses [1–3].In the age of new conformal techniques, there is a real need for a clear definition of treated volumes, such as breast, tumour bed, lymph node areas and organs at risk (OAR) [4–10].Many teams have been working for several years on the definition of treated volumes.
