FORD 351 ENGINE ROTATION

Nov 29, 2020

[Ford 351 Engine Rotation](#)

The 351 Windsor was in a league of its own because of its heightened deck block, larger connecting rods and much "beefier" main bearing caps. It also had a very distinct firing order that was nothing similar to the standard Ford V8 firing order of 15426378. The first years of the 351 Windsor engines were quite impressive with horsepower ratings reaching into the 300 range. The 351 Windsor engines that were produced from 1969 to 1974 are generally considered to be much better than the ...

The casting numbers on the block of a Ford engine help identify the specific engine. The numbers are often useful in mating cylinder heads, determining when and where the block was manufactured and into which mode of Ford it was installed. Locating the casting number is relatively easy if you're physically fit and have some dexterity. The casting number must be decoded to understand the ...
