

FORD 351 ENGINE WEIGHT

Dec 01, 2020

[Ford 351 Engine Weight](#)

Ford offered two versions of the 351 engine, a Windsor 351 and a Cleveland 351. The Windsor motor is considered a small block. The Cleveland 351 is between a small block and a big block. Even though the Cleveland 351 came from the small block family, few parts will interchange. The heads on the 351 4 barrel engine were very similar to the Boss 302 heads. In 1971, Ford offered only a two barrel ...

Ford 351 Cleveland V8 Engine. The 351 Cleveland was introduced in 1969 as Ford's new performance car engine and was built through the end of the 1974 model year. It incorporated elements learned on the 385 big-block series and the Boss 302, particularly the poly-angle combustion chambers with canted valves and the thin-wall casting technology. Both a 4V (4-barrel carburetor) performance ...

The 351 Windsor engine was produced by Ford and had a long reign, beginning in the 1960s, and although not commercially available, it is still used by many rebuilding Ford small blocks for their project cars. This most well-known car that this engine was used in may be the Mustang, but this engine was also used in many other models as well, including the Cougar, Torino, Maverick, and many ...

If you are talking about stock versus stock, then it is about a push in a light car, because the 460 will make up for the weight, but the 351 Cleveland is a solid engine. I actually am working on a 351 Cleveland right now that is out of my first car, that I am going to put together and sell, just because I don't need it for anything.

The 351 Windsor Engine. The 351 Windsor engine is an 8 cylinder, 90 degree, overhead valves (OHV) engine. It was introduced in 1969, and got its name from the Windsor Canada location of the Ford assembly plant that built them. There were two versions introduced in 1969, the 250 hp 2 barrel engine and the 290 hp 4 barrel version.

I'm building a 331ci stroker based on a Ford 302 short-block from DSS Racing. The paperwork that came with the short-block said the engine was internally balanced to 28.2 oz-in.

[Ford vs Chevy: Size, Weight, and HP Per Pound Comparison](#)

The 351 is not a low friction engine and 5w30 oil were not in common use or approved in 1971 for this engine. Because your summer temperatures go above 90 degrees I would swap half way thru the year. use 10w30 in Fall and Winter, and 20w50 in Spring and Summer. As for using a straight weight oil--that went out with the 1950's and the belief that a engine is worn out at 50,000 miles.
