Transmission: Toploader (also called "T&C" or "10 bolt top cover") 4 speed manual: Sources: 1967-1982 Ford cars and some trucks. Since it was used for so many years there are several different versions of this transmission. Tail shaft lengths will vary, but you won't need the tail shaft anyway, just the case. Identification:

4 Speed Transmission Identification Chart We often have customers asking us how can they identify the 4 speed transmission in their car or truck. The chart on the link below will help you ID your trans to help you figure out what is the correct Hurst Shifter and Linkage Installation kit.

[List of Ford transmissions - Wikipedia](#)

In 1979, the foxbody Mustang was introduced with the SROD (Single Rail Overdrive) 4-speed manual transmission and was used up to 1982. These weren't rated for anything much more than 200lb-ft of torque and not really recommended for anything other than the stock engines the 79-82 had. To upgrade to a T5 (which is plentiful and cheap) you will need to change the flywheel (if upgrading to ...

[FORD 4 SPEED TRUCK TRANSMISSION - VANPELT SALES](#)

Ford, just like GM, used a T10 4-speed. The Toploader was introduced in Ford cars in 1964. There are several years in which both the T10 and Toploader were actually used within the same platform. The passenger- car Toploader came in three different case lengths and several spline configurations. Output shafts in early 1964-1965 cars had weak 25-spline output shafts. Later, these were revised ...

These four-speed units will bolt into many existing Ford standard-shift applications. If you are converting from an automatic, you will need to find a compatible manual bellhousing to go with your Toploader. There were 18 different Ford bellhousings used from 1963 to 1973 that will accept this transmission. The Toploader is also compatible in ...

[Automatic Transmission Identification Guide](#)

The T98 transmission is a heavy-duty, top loading, truck style four-speed. The Borg-Warner T98 transmission was introduced in 1948 and persisted until 1964 in Ford trucks. It was installed into Jeeps starting in 1955. The Jeep T98 was a desirable, but rare option for Jeeps through 1972, as it was a special order item for civilian versions. It was more common in military versions of the CJ like ...

[Ford 4 Speed Manual Transmission Identification](#)

Manual Transmission Identification: As mentioned above, modern 5-speed and 6-speed manual transmissions are easy to identify, but older 4-speed transmissions have more variety. While there are no distinctive pans and bolt counts to make transmission identification simple, 4-speed manual transmissions can be generally identified by examining the side profile. The shape of the main housing will ...

All Ford Bronco II's are equipped with 4x4 type transmissions. The 2wd Bronco II's use a "dummy" transfer case. Automatic Transmissions: C5 Automatic: The C5 is essentially a C4, but with a lock-up clutch in the torque converter to improve highway fuel economy. The C5 was used in the 1983-1985 4X4 Ford Ranger. The C5 is a good transmission, and was the only automatic used in a 4x4 ...

[Ford Ranger Transmission Identification | It Still Runs](#)

The Tremec T176 transmission was the optional four-speed transmission found in 1980 to 1986 Jeep CJ models. It is a good transmission when well maintained and has often been adapted to V8 and V6 power. Rated at medium-duty, the T176 is stronger than its compact size may suggest. Though it only holds a candle to the truck style four-speeds' strengths and capabilities, the T176 is frequently ...

[Ford Pinto Transmission Cross Reference ~ Roadkill Customs](#)

The reason I conclude that there's two OD sizes is that I came across clues in an early full size Ford shop manual. Under oil capacities it listed a 6 & small V8 as taking less oil than a trans from a 352/390 V8. The manual, in typical fashion, didn't come out and say there were two basic OD transmissions. Unless the two transmissions were side by side, I don't know how to tell if a particular ...

[GM Manual Transmission Identification - Part Trace](#)

Ford's various three-speed automatic transmissions came in a number of applications and a variety of types. The lightest duty of the three-speed automatic transmissions, the C3, and the oddball "Cruise-O-Matic" series probably won't be of any interest to many car crafters. From a V-8 performance standpoint, there are really only two transmissions to consider - the C4 and the C6. The C4 ...

[Toploader 4 Speed Transmissions](#)

C3 – The Ford C3 is a light duty 3-speed automatic transmission that was available in the 1983-1984 2WD Ford Ranger. This transmission was replaced by the A4LD in 1985. The C3 is a weak transmission that was only intended for light duty 4-cylinder applications, and small V6's. Because of it's light duty, it was not used in 4x4 applications.
