HOW TO REPLACING OEM SUBWOOFER IN 3RD ROW IH8MUD FORUM

Dec 03, 2020

[How To Replacing Oem Subwoofer In 3rd Row Ih8mud Forum](#)

My 3rd row subwoofer blew out a few weeks ago and I finally got around to replacing it. Thought I do a quick write up in case anyone else has to go through this. The OEM JBL enclosure in my 2003 LC with Nav contains one Dual Voice Coil 5.75" subwoofer. I replaced it with a 6" sub and had to trim away some plastic around the mounting surface ...

How to: Replacing OEM Subwoofer in 3rd Row FWIW, I did the Pyle 6" sub install last weekend. It might fit without trimming in the LX, but in my '04 LC it required trimming. The sub has to sit flush in the housing; if there is a gap between the frame and enclosure then you have the same issue as having the foam blown out - air is...

Right now its a passive subwoofer in a ported box. 100w max watts 80hz 6.5" sub. 3ohm frequency response 40hz-150hz 4.995kg weight The 3ohm is throwing me off, but Id be open to inexpensive suggestion, Id actually be open to throw a subwoofer up to 8" in its place, as long as it was in the wattage range and would increase the bass a bit.

Most subwoofers after 2010 were made with 2 voice coils, having two voice coils does nothing more than allow you to wire the subwoofer at different power levels. All subwoofers have at least one voice coil which is indicated by the terminals on the amplifier labeled (-) and (+). At the bottom of each subwoofer you'll see a pretty big metal contraption, usually circular, this is actually a magnet.

Graph 3. Corrected response of two subwoofers (Layout 1), measured at three locations . You may find that you can "tweak" the subs to improve the response. In our case, we found that adding 2 ms of delay to the front subwoofer eliminated a couple of notches in the response and reduced spatial variation above 80 Hz. Overall, compared to Graph 2, this is definitely an improvement! Method B ...

If you don't own a subwoofer at all, and are rerouting all bass to your main speakers, just add +10 and assume you'll need one. For everyone else, add up the applicable point totals from each row. If your total score is 0-5, you can probably get by with your current subwoofer. If your total score is > 5, it's time to consider a subwoofer ...

[Toyota Genuine Parts](#)

If you're installing a subwoofer in your vehicle, you'll need to wire up your audio system to the amplifier before connecting your subwoofer. This will involve disassembling your dashboard and running multiple wires from the head of your vehicle to the sub in the trunk or under your front seat. This won't necessarily be difficult, but it can be time consuming, so make sure that you have ...
