[Laser Rigging Guide - Caution Water](#)

This is a step by step instruction on how to rig the original laser. You should have the boat itself (the hull), the dagger board, the rudder and tiller, your mainsheet, both mast pieces, boom, boom bang and sail in one place. Attach the boom vang (This piece holds the boom down).

[A Laser Taining Manual - Callala Junior Sailing School](#)

On a Laser, you have only a few trim lines you can adjust during sailing. You can change the shape, and therefore the power, in your sail with the sheet, vang, outhaul, and Cunningham. Each option will change the draft (shape/depth) of your sail, and therefore the power your sail will generate.

[RIGGING GUIDE | Laser Dinghy Cunningham - YouTube](#)

Slide the rudder pins into the eyes on the backside of the laser, and make sure that the clip is holding it down. Test it by pulling up on the rudder. Then put on the tiller by sliding it into the space on the top of the rudder. Once it's in, insert the pin to hold it there.

[Bahia Rigging Manual version 1 - West Coast Sailing](#)

The Bahia rigging instructions are a guide to rigging your boat. LaserPerformance reserves the right to make design and/or specification changes to any of their products as part of their continuous development program. Important information There are three hatches and one transom drain plug on the Bahia. They should be checked to ensure a correct and water tight fit, everytime you sail. Leach ...
