It is fair to state that tunable lasers have revolutionized optical spectroscopy. Several monographs and review articles on laser spectroscopy have been published [9,1-18]. A wealth of material is presented in the proceedings of international laser spectroscopy conferences [9,19-27].

[Laser Spectroscopy IV | SpringerLink](#)

Spectroscopy and spectrography are terms used to refer to the measurement of radiation intensity as a function of wavelength and are often used to describe experimental spectroscopic methods. Spectral measurement devices are referred to as spectrometers, spectrophotometers, spectrographs or spectral analyzers.. Daily observations of color can be related to spectroscopy.
