If you are doing the B6T swap there is little wiring to do. Plug the Pro LX ecu in, change some connectors under the hood and replace the old disty with your MX-3 disty. <P>To wire a S-AFC in it is fairly simple. Go to Mazda and ask to see the wiring diagram for your model/year of MX-3. There is approximately 3 pages of info telling you which wire does what. It is in a table format, very easy ...

The wiring diagrams are grouped into individual sections. If a component is most likely found in a par-ticular group, it will be shown complete (all wires, connectors, and pins) within that group. For exam-ple, the Auto Shutdown Relay is most likely to be found in Group 30, so it is shown there complete. It can, however, be shown partially in another group if it contains some associated wiring ...

If your Mazda's check engine light or another malfunction indicator light illuminates, it is because of a signal the PCM received. The PCM will trigger the indicator light to illuminate to inform you there may be an issue with your Mazda. Occasionally, the information remains stored with your PCM, even after the issue has been fixed, and your indicator light may remain on until the PCM has ...
