Fully working OM2 SP cameras can command quite a high price, so rather than spend the £50 to £100 a working camera would cost, I bought a non working version for £20 instead. Since that included a 50mm f/1.8 Zuiko lens I thought that wasn't a bad deal. Olympus OM-2 Spot Program ...

Now, the one big Achilles heel for the OM-2S, OM-3 and OM-4 was the ...

The OM2S Program In 1984, Olympus introduced its OM2S-Program, which added a "fully automatic" mode, in addition to aperture priority and manual modes. Also, the camera had a nifty spot-metering system. These features may seem old hat to us today, but they were a big deal when introduced back then. Olympus-philes viewed the OM2S Program with suspicion -- the camera's styling and graphics ...
