Post-War USA is an affluent society and, consequently, it needs a different economic paradigm • We live in an age of public squalor and private wealth, illustrated succinctly by Galbraith's point that people are happy to spend on vacuum cleaners and cleaning materials for their homes, but are not so happy to support the burden of street cleaners, giving us clean homes and dirty streets.

John Kenneth Galbraith's The Affluent Society explores affluence in America. He challenges many prevailing views on economics including economic security and production, as well as marginal utility and consumer demand. Galbraith seems to think of the poor as this kind of noble mass that has suffered titanic wrongs at the hand of society. What he doesn't say is that cultural pathologies contribute mightily to poverty. Many just refuse to play by the rules that most people follow. He also advocates shorter work weeks (which never worked) and redistribution of wealth, which found full fruition under Lyndon Johnson's "Great Society", which did nothing more than breed great amounts of crime and dependency.
