MG Hardie surely is a strongwriter with a good sense of how to build up tension in a story and how to makethe reader feel like they are a part of it. This would make a good audio bookas well, I think (with an appropriate voice actor of course). Them was quiteauthentic - also love the cover. This story was a breath-taking journey, ascenario that captures the reader and makes you want more. I'll give it 5Stars." Vanessa Winter author of The Golden Heart

Coming from a second, more advanced earth, Them came to attack and destroy through any, seemingly, natural catastrophe that ultimately will end this earth. Why? Because The System had already done it to most of theirs by using nuclear bombs that blasted beyond and into another dimension where the majority of people were killed instantly and the radiation slowly destroying the rest, as well as animals and vegetation.

The Mg/Ca models of Wilkinson and Algeo and Hardie have substantial differences due to the former incorporating the effects of dolomitization and the latter ignoring them. The Mg/Ca values calculated from echinoderms are close to parts of the two model curves at different times (Fig. 3), and their overall concentration is similar, except for the Cambrian values.
